

Link to lab: <https://37cameron.github.io/ist363/lab01/lab01.html>

1. By typing one singular exclamation mark you can spawn in the base html tags with the click of a button.

Codepen.io is an online tool for testing and sharing HTML/CSS/JavaScript. We're going to use it this semester in lectures and labs. There's no need for the required HTML page tags you see above in Codepen.io. For the following questions we will be using code you can find here: <https://codepen.io/Laurie-F/pen/azoYrEG>.

The questions below are all about selectors. If you are shaky on selectors go to Blackboard and **do this week's reading first**.

1. Write one CSS rule that makes the following change. You may not change the HTML.  
h1, h2, h3 {color: blue;}

Original	Change
<a href="#">About</a>   <a href="#">Labs</a>  <b>Welcome to IST 363</b>  <b>Course Syllabus</b>  Download the <a href="#">course syllabus</a> .  <b>Course Schedule</b>  Download the <a href="#">course schedule</a> .	<a href="#">About</a>   <a href="#">Labs</a>  <b>Welcome to IST 363</b>  <b>Course Syllabus</b>  Download the <a href="#">course syllabus</a> .  <b>Course Schedule</b>  Download the <a href="#">course schedule</a> .

2. Write one CSS rule that makes the following change. You may not change the HTML.  
nav a {text-decoration: none;}

Original	Change
----------	--------

<a href="#">About</a>   <a href="#">Labs</a>  <b>Welcome to IST 363</b>  <b>Course Syllabus</b>  Download the <a href="#">course syllabus</a> .  <b>Course Schedule</b>  Download the <a href="#">course schedule</a> .	<a href="#">About</a>   <a href="#">Labs</a>  <b>Welcome to IST 363</b>  <b>Course Syllabus</b>  Download the <a href="#">course syllabus</a> .  <b>Course Schedule</b>  Download the <a href="#">course schedule</a> .
---	---

3. Write one CSS rule to change the background color of the About and Labs links when a mouse moves over the link. Don't change any of the other links on the page.
- ```
nav a:hover {background-color: yellow;}
```

| Original                                                                                                                                                                                                                                              | Change                                                                                                                                                                                                                                                |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">About</a>   <a href="#">Labs</a><br><br><b>Welcome to IST 363</b><br><br><b>Course Syllabus</b><br><br>Download the <a href="#">course syllabus</a> .<br><br><b>Course Schedule</b><br><br>Download the <a href="#">course schedule</a> . | <a href="#">About</a>   <a href="#">Labs</a><br><br><b>Welcome to IST 363</b><br><br><b>Course Syllabus</b><br><br>Download the <a href="#">course syllabus</a> .<br><br><b>Course Schedule</b><br><br>Download the <a href="#">course schedule</a> . |

4. Write one CSS rule that makes the following change. You may not change the HTML.
- Use any sans serif font.
- ```
.syllabus {font-family: arial;}
```
